

# Universal Portal

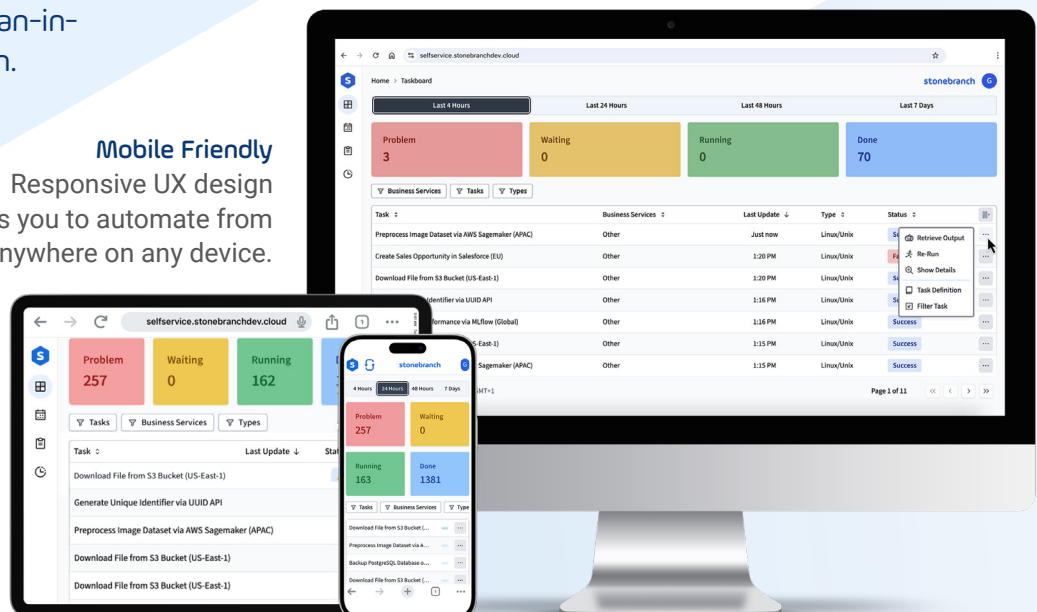

- Allow tech-savvy and non-technical users to trigger, monitor, and manage automation.
- Eliminate complexity with an intuitive, multilingual interface.
- Access automation seamlessly across desktops, tablets, and mobile devices.
- Ensure security and governance with single sign-on (SSO) and role-based access controls.
- Provide instant visibility into workflow execution with real-time data.
- Enable manual reviews and approvals with human-in-the-loop automation.

**Automation for all! Empower users of any skill level to check, trigger, and review automation.**

Stonebranch Universal Portal is a self-service automation solution designed to extend the power of Universal Automation Center (UAC) to a broader audience. Whether you're an IT professional, a DevOps engineer, or a business user, Universal Portal provides an intuitive interface that makes automation accessible while maintaining enterprise-grade control, visibility, and security.

With Universal Portal, enterprises can expand automation beyond IT, enabling employees at every level to manage their processes while IT maintains control and security.

**Mobile Friendly**  
Responsive UX design allows you to automate from anywhere on any device.

## Employees at every level can streamline tasks and processes...

Universal Portal is packed with powerful yet user-friendly features that simplify automation management.

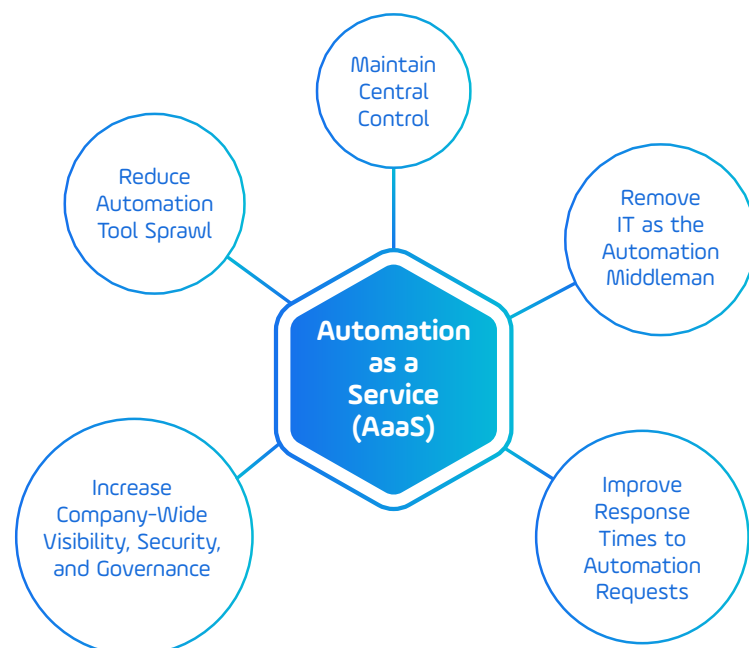

-  **Empower Non-Technical Users:** Streamline the ability to check, trigger, and review automation – for everybody.
-  **Simplified User Experience:** Get straight to the point. No need to interact with code or complex form fields.
-  **Human-in-the-Loop:** Perform manual process and job approvals to keep workflows running smoothly.
-  **Multilingual Solution:** Support end-users globally. Available in all major European languages – with more to come.
-  **Role-Based Visibility:** Use inbuilt access controls to manage what end-users can view and automate.

## ...while IT maintains control and oversight with automation-as-a-service.

By offering automation-as-a-service to a growing set of end-users, central IT:

- Expands reach and adoption of automation
- Improves response times to automation requests
- Removes IT as the automation middleman (less tickets)
- Increases company-wide visibility, security, and governance
- Maintains the centralized control IT requires
- Reduces automation tool sprawl

Offering automation-as-a-service is a win-win for central IT and citizen automators alike.

## Stonebranch Simplifies Real-time Automation

Stonebranch builds IT orchestration and automation solutions that help enterprises break down automation silos while gaining centralizing control of automated jobs, tasks, and workloads.

The Universal Automation Center platform supports your entire hybrid IT environment, including on-premises, cloud, and containerized microservices. The platform runs automation in real-time, responds intelligently to business needs, and integrates with just about any application or platform you can throw at it.
